CRYPTOVERSE: A CRYPTOCURRENCY DASHBOARD

Introduction:

Project Title: Cryptoverse :A Cryptocurrency Dashboard
Team Members: [Bincy Susan S, Kowaslya.H, Preethika.S, Gayathri.G, Reshma S]

Project Overview:

Purpose: The project aims to provide real-time tracking, analytics, and management of cryptocurrency assets and user-friendly dashboard.

Features:
➢ Real-time cryptocurrency price tracking
➢ Trading Tools
➢ Cryptocurrency market cap rankings
➢ Interactive charts for price history
➢ User authentication (if applicable)
➢ Dark/Light theme toggling

Architecture:

➢ Component Structure: Navbar, Header , Search Bar, coin details, footer
➢ State Management: Context API for global state, use State for local state
➢ Routing: Implemented with React Router Dom for seamless navigation

Setup Instructions

➢ **Prerequisites:** Node.js, npm, Git, React.js
➢ **Installation:**
    1. Clone the repository
    2. Navigate to the project folder
    3. Install dependencies with npm install
    4. Start the development server with npm start
    5. Open http://localhost:5173 in a browser

Folder Structure

/cryptoverse-react
■■■ /src
■ ■■■ /components
■ ■■■ /pages
■ ■■■ /styles
■ ■■■ /utils
■■■ package.json
■■■ README.md

Running the Application

Command: npm run dev

Component Documentation

- **Key Components**: Navbar , Hero Section, Search Bar, Category Page, Exercise Page
- **Reusable Components**: Buttons, Cards

State Management

- **Global State**: Managed using React Context API
- **Local State:** Managed using use State hooks

User Interface

- Home page
- Coins detailed page

Styling

- **CSS Frameworks/Libraries**: Tailwind CSS, React Icons
- **Theming:** Light/Dark mode.

Testing

- Testing Strategy: Unit Testing with Jest, Integration Testing with Cypress
- Code Coverage: Ensured with Jest coverage reports

Known Issues

- Lack of compliance tracking for evolving crypto regulations.
- Delayed or missing price/market alerts.
- Price and market data may not always reflect real-time changes.

Future Enhancements

- AI-driven price predictions, on-chain data, sentiment analysis.
- Auto rebalancing, trading bots, multi-exchange support.
- AI-generated summaries, whale activity alerts, regulatory updates.
